SUMMARY

Hello! I'm Ibrar Hussain. I am passionate about Web development and especially Web development front-end and back-end and master of Laravel framework. Junior Web Developer with around 2 years of experience in software development Lifecycle (SDLC) including analysis, design, development, and testing, deployment. I am a quick learner and a team worker that gets the job done also a future React and Node Developer.

I got a bachelor's degree in BSC Information technology, it was a part of my life that I didn't learn a technical skill only. But also how do you take a look at the issues and solve them. But I realize this isn't where I want to be. That's takes about a year of my life.
